

ARUNKUMAR K. Frontend Developer | React.js | Banking & Fintech Domain

Bangalore, Karnataka +91 9380647157 | arunkolukari8@gmail.com

linkedin.com/in/arun-kumar-246b78205

PROFESSIONAL SUMMARY

Result-oriented Frontend Developer around 4 years of experience building scalable, high-performance web applications in the Banking and Financial (Fintech) domain. Expert in the React.js ecosystem, specializing in Context API for state management and modern React Hooks. Proven track record of migrating legacy codebases (React 16 to 18) and optimizing application performance. Adept at using AI-driven development tools (GitHub Copilot, Cursor) to accelerate delivery. Experienced in AWS CI/CD workflows and mentoring junior developers.

TECHNICAL SKILLS

- **Core Frontend:** React.js (v16/v18), JavaScript (ES6+), HTML5, CSS3, TypeScript (Familiar).
- **State Management:** Context API & Hooks (Primary), Redux/Redux Toolkit (Secondary).
- **UI/UX & Styling:** Responsive Design, Material UI (MUI), Bootstrap, CSS Grid/Flexbox, Ag-Grid.
- **Build & Testing:** Webpack, Babel, NPM, Jest, React Testing Library, SonarQube.
- **Cloud & DevOps:** AWS (S3, CloudFront, CodePipeline), CI/CD Automation, Git, GitHub.
- **Backend Familiarity:** Node.js, Express.js, RESTful API Integration.
- **AI Tools:** GitHub Copilot, Cursor, Claude AI.

PROFESSIONAL EXPERIENCE

Software Engineer | Idexcel Technologies, Bangalore Aug 2023 – Present Domain:
Banking & Financial Services (Fintech)

- **React 18 Migration:** Spearheaded the major version upgrade of the Loan Origination System (LOS) from React 16 to React 18, resulting in a 40% improvement in rendering performance and stability.
- **State Management Architecture:** Architected application state using **React Context API and useReducer**, replacing complex legacy prop-drilling patterns to handle large-scale financial data flows.
- **Feature Development:** Developed dynamic, reusable UI components for the LOS dashboard and integrated RESTful APIs for real-time credit analysis and financial spreading.
- **Data Visualization:** Implemented complex data grids using **Ag-Grid** to display financial spreads and transaction histories effectively.

- **Code Quality & Mentorship:** Enforced strict code quality standards using **SonarQube**, achieving high test coverage; mentored 2 junior developers on React best practices.
- **DevOps & Automation:** Managed deployment pipelines via AWS CodePipeline (Dev, QA, UAT, Prod) and utilized GitHub Copilot to automate boilerplate coding, increasing sprint velocity.

Software Engineer | Bridgeline Digital, Bangalore *Jul 2022 – Aug 2023 Domain: E-Commerce*

- **E-Commerce Development:** Built responsive, cross-browser compatible e-commerce interfaces using **React.js**, ensuring a seamless user experience across devices.
- **Performance Optimization:** Optimized frontend assets and code structure using reusable components, significantly improving initial page load times.
- **UI Implementation:** Collaborated with UI/UX designers to translate Figma wireframes into pixel-perfect React components.
- **Maintenance:** Maintained existing application state using Redux and resolved critical UI bugs to ensure high availability.

EDUCATION

Bachelor of Technology in Computer Engineering Presidency University, Bangalore,

July 2018 – July 2022
